

Backloading opportunity

Safeguard your LimeX needs...

... and make worthwhile savings by using our backloading opportunity during the campaign!

Furthermore, significant savings can be made on your fertiliser inputs with LimeX.

One tonne of LimeX70 contains a minimum content of:

Total P ₂ O ₅	10kg/t
Total MgO	7kg/t
Total SO ₃	6kg/t

Can be included in fertiliser balance for following crop.

Realising the nutrient value

The information below shows the minimum contribution from the three nutrients:

Phosphate (P₂O₅)

- At 5 tonne/hectare this equates to 50kg of P₂O₅ worth £35.00

Magnesium (MgO)

- At 5 tonne/hectare this equates to 35kg MgO worth £14.00

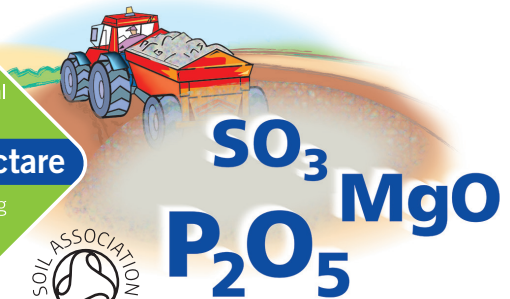

Sulphate (SO₃)

- At 5 tonne/ hectare this equates to 30kg of SO₃ worth £3.00 (25-40kg SO₃/ha is recommended where deficiency may occur)

The combined value of these integral nutrients is around

£60.00 per hectare

inclusive of the saving of application of individual nutrients
